

MOUNT SINAI
SCHOOL OF
MEDICINE

Postdoctoral Fellowship

The Mount Sinai School of Medicine in New York is currently seeking Postdoctoral Fellows to study the role of microRNAs and other regulatory RNAs in the immune system. The fellow will join a close collaboration of the Brown lab with the Merad and Sachidanandam lab at Mount Sinai. We are trying to better understand the molecular programming of antigen presenting cells, and apply this information to develop novel approaches for modulating the immune system. Experience in molecular biology and immunology and working with animal models is encouraged.

Please send your CV to:

Brian D. Brown, Ph.D.,
Department of Genetics and Genomic Sciences,
Mount Sinai School of Medicine Immunology Institute,
1425 Madison Avenue,
New York, NY 10029.
Email: brian.brown@mssm.edu.
