

Postdoctoral Fellow Positions
W. M. Keck Center for Transgene Research
The University of Notre Dame

Applications are invited for postdoctoral fellow positions available in a multidisciplinary academic research group to develop and characterize deficiencies of hemostatic and related factors in gene knock-out mice. The successful candidate would have a strong background in structural biochemistry, protein expression, molecular biology, cell biology, animal physiology, or related fields.

Interested candidates should send their curriculum vitae and 3 letters of recommendation to:

Victoria A. Ploplis, Ph.D.
Associate Director
W. M. Keck Center for Transgene Research
230 Raclin-Carmichael Hall
University of Notre Dame
Notre Dame, Indiana 46556

The University is an Affirmative Action/Equal Opportunity Employer
